

# Welcome

to Plumas District Hospital

Choosing a location to establish your practice is both an important professional *and* lifestyle decision.

Plumas District Hospital and the central Plumas county region provide the perfect mix of a rewarding career and a quality lifestyle.

Plumas District Hospital is a Joint Commission accredited not-for-profit rural hospital. Plumas District Hospital is financially sound and enjoys a great deal of community support. Last summer voters overwhelmingly approved a bond measure to fund a new hospital.

The community of Quincy, home to Plumas District Hospital, is located in a picturesque mountain valley, surrounded by the Plumas National Forest. Residents enjoy a four-season climate and easy access to outdoor activities of every kind. Other charming characteristics include a quaint main street, historic movie theatre, active arts community, thriving junior college, live music festivals, county fair and farmer's market. Larger communities of Chico, CA and Reno, NV are within an hour and a half drive. Affordable housing options range from well-preserved historic to newly built homes as well as larger properties, all within minutes of the hospital.

We welcome any inquiries you have about our hospital, physician opportunities or the beautiful region in which we live. Call today or visit our website at [www.pdh.org](http://www.pdh.org)
